

Take a **STEP** toward better **HEALTH**

According to the American Heart Association, walking has the lowest dropout rate of any physical activity. Think it doesn't do any good? Think again. Walking for as little as 30 minutes a day can have the following health benefits¹:

- Reduce the risk of coronary heart disease
- Improve blood pressure and blood sugar levels
- Maintain body weight and lower the risk of obesity
- Enhance mental well-being
- Improve blood lipid profile
- Reduce the risk of osteoporosis
- Reduce the risk of breast and colon cancer
- Reduce the risk of Type 2 diabetes

Walking is low impact; easier on the joints than running. It is safe – with a doctor's okay – for people with orthopedic ailments, heart conditions, and those who are more than 20% overweight. In addition, research has shown that you could gain two hours of life for each hour of regular exercise¹! That quick stroll around the block seems a little more worthwhile now, doesn't it?

Join your doctor and other people looking to improve their health at the next Walk with A Doc event.

Time: 12:15-12:45 pm, Thursdays from May 13 – October 14 (weather permitting)

Location: Mid Coast Medical Group–*Topsham Internal Medicine*, One Wellness Way in Topsham

Who can attend: Everyone is welcome!

COVID-19 safety protocols will be in place. Please use available hand sanitizer prior to the walk, wear a mask and maintain 6 ft social distance during the walk.
